## **MOMENTVILLE CELEBRATES 365 DAYS OF CAPTURING MOMENTS**

**Sydney, Australia, 1 September, 2008** – After only twelve months of operations, MomentVille has established itself as a leading global wedding website company.

With average monthly growth in excess of 35 percent, MomentVille is now the wedding website provider of choice in major markets, USA, Australia and Canada. Couples continue to set up personalised websites in record numbers, to share and exchange details of their respective weddings.

“Tens of thousands of couples have searched out our innovative online wedding website company, signed-up as users and begun to share real-time, customised information with friends and family. As we continue to grow, we are committed to launching ongoing enhancements to offer maximum value to our users,” said Geoff Evason, CEO, MomentVille.

Gone are the days of frantically keeping track of RSVPs and setting up phone pyramids to communicate with guests. MomentVille heralds a new online age in wedding planning, harnessing the full potential of the social networking phenomena. Within minutes users are able to set up their own personalised website around their own, unique wedding and share news, logistical details, photos and much more with invited guests.

Over the coming months MomentVille will launch a series of new product innovations which will provide users with a variety of options.

### **ABOUT MOMENTVILLE.COM**

MomentVille.com was founded in 2007 with a single mission: Help people plan, share, and remember life's special moments. MomentVille allows users to quickly and easily build their own personal, stylish wedding websites. MomentVille's exciting and intuitive interface makes it one of the most popular ways for couples to share information and interact with their guests. It is among the leading global social networking websites.

MomentVille.com is committed to sound principles of sustainable growth. The company offsets the carbon produced by their servers, helping to reduce the levels of greenhouse gases in our atmosphere.
